EDUCATION

Nirma University

B.Tech in Computer Science and Engineering – GPA: 8.25/10

Ahmedabad, India

Aug 2023 – May 2027

EXPERIENCE

Full Stack Developer Intern

May 2026 – Jun 2026

SkyWebTech

Rajkot, India

- Developed features for a **Client Project Management Portal** that enables clients to submit requests, track project progress, and communicate with the development team.
- Built responsive UI components using **React.js** and integrated backend APIs developed with **Node.js/PHP** and **MySQL**.
- Collaborated with a cross-functional team to implement, test, and deploy new portal functionalities.

PROJECTS

Agent Paperpal | React, Vite, TailwindCSS, CrewAI, FastAPI, Google Gemini | GitHub – Live Demo

- Built an AI-powered multi-agent system converting PDF/DOCX manuscripts into APA/IEEE-compliant formats with automated citation compliance scoring using a 5-agent CrewAI pipeline.
- Designed a React UI with real-time agent progress tracking exposing three formatting modes (standard, semi-custom, full-custom), reducing manual formatting time from hours to minutes.
- Integrated Google Gemini for structured LLM outputs and built a FastAPI backend to orchestrate agent workflows.

Healthcare Readmission Prediction | Python, Scikit-learn, Pandas, XGBoost | GitHub

- Engineered ensemble ML models (Random Forest, GBM, XGBoost) predicting patient readmission at 30/60/90-day intervals, procedure cost, and risk level on CMS healthcare datasets.
- Performed feature engineering and EDA; achieved 84% accuracy and delivered clinical insights via an interactive Streamlit dashboard.

Full-Stack E-Commerce Platform | Next.js, Node.js, MongoDB, TailwindCSS | GitHub – Live Demo

- Built a fully responsive multi-category fashion store with product catalog, shopping cart, and end-to-end checkout flow using Next.js and TailwindCSS.
- Developed RESTful backend APIs in Node.js with MongoDB; reduced query response time by approximately 40% through indexing and query optimization.

ACHIEVEMENTS

- **1st Runner-Up – HackaMined 2026:** Built AI-driven multi-agent workflows for Agent Paperpal using CrewAI, Google Gemini, and FastAPI, automating research paper formatting and citation validation.
- **1st Place – RWEsearch & Health Innovation Hackathon 2025 :** Predicted readmissions and costs via ensemble ML (RF, GBM, XGBoost) with a Streamlit clinical dashboard.

TECHNICAL SKILLS

Languages: Java, C, C++, Python, JavaScript

Frameworks & Libraries: React.js, Next.js, Node.js, TailwindCSS, FastAPI, CrewAI

Databases & Tools: SQL, MongoDB, Git/GitHub, Streamlit, Canvas API, Amazon AWS

AI/ML: Google Gemini, LLM Agents, Scikit-learn, XGBoost, Ensemble Models, Graph Algorithms, Prompt Engineering

Domain Knowledge: Accounting Principles, Financial Analysis, Business Finance, Cost Management
